

Traffic Advisory System GTS800 on EC 130 T2

Description:

This certified modification enables the installation of a Garmin GTS 800 Traffic Advisory System (TAS) on EC130 T2 rotorcraft.

The GTS 800 actively interrogates nearby Mode C transponders to detect potential traffic conflicts and **provide real-time Traffic Advisories (TAs)** to the flight crew.

The system enhances situational awareness by helping the pilot visually acquire surrounding aircraft. **Aural alerts** are delivered directly to the pilot and co-pilot headsets, enabling timely and effective responses to nearby traffic.

Key benefits:

-  The installation kit includes all necessary components and is delivered with **EASA form 1**.
-  Quick installation : Direct interface with Garmin displays ; Optimized mechanical supports make **installation fast and straightforward**.
-  OEM-Recognized : **Officially labeled by Airbus Helicopters** for guaranteed design quality and full compatibility.
-  Enhanced Situational Awareness : **Real-time traffic monitoring and aural alerts**.
